Night Work Underway on Pacific Avenue Resurfacing Project

(Stockton, CA) - The Pacific Avenue Resurfacing Project is underway through October 2017, resurfacing Pacific Avenue from March Lane to Hammer Lane and Thornton Road from Hammer Lane to El Camino Avenue. Some activities must take place at night when there is very little traffic and impact to the public. Residents in the surrounding area may hear noises related to construction activities at night. Patience is greatly appreciated, as this temporary inconvenience will result in a much-needed, new surface on this highly traveled street.

Travelers along the construction route will temporarily experience rough-textured pavement until final surface is applied. The completion phase will include utility work and striping. Businesses will remain open throughout the project.

This project, funded from the federal Regional Surface Transportation Program, will make improvements to 2.3 miles of roadway. These are high traffic streets with poor pavement conditions, and the last resurfacing was over 17 years ago.

Work on the project is being done by Granite Construction Company. As construction progresses, signage will be placed to notify drivers of changing conditions and workers in the area. Some travel tips to help during the construction:

- During the day, only one lane or turn lane will be closed, in either direction, at a time.
- Allow extra time for travel and anticipate some traffic delays while work is occurring.
- Speed limits will be reduced to 25 mph during construction; slow for the cone zone.
